## A Note From The Director

An update on the addition...I believe we are looking for a completion date in November. Once again, you have all been so patient with that parking lot. I believe the extra room will be just that for a period of time. I am hoping to maybe add some music lessons and use the room for computer class and we have a number of physical, occupational, and speech therapists that come in and work with children and we are limited to provide space for them. We will eventually use it for more classroom space, but for now I believe it will just be an added space for us to use.

Sincerely,

Terry Peterson

Director/Owner
